Ausllast Electronics Co.,Ltd

Dongguan Ausllast Electronics Co., LTD was established and founded by Dr. Ping Wang in 2009 and has quickly established itself as a professional manufacturer offering a quality of product that meets the standards demanded and required by the markets in industrially and commercially advanced countries. Ausllast is an energetic forward thinking manufacturer that offers an added value to the market by providing services beyond that of a traditional manufacturer. Ausllast looks to design and manufacturer products that the market is demanding and not what the manufacturing industry "thinks" it should have.
